# HISTORY AND NATURE THE POSÁZAVÍ

The variety of services in the Posázaví Region is considerably wide, and in fact everyone will find what they are looking for in this area.

You will discover this after you have read this comprehensive brochure of the Posázaví Region. And if you do not find your inspiration in the book, please visit the web pages [www.posazavi.com](http://www.posazavi.com), which list an events calendar, updated daily, where you will surely find something to your liking.

The natural splendours are the primary object of this year's promotion. Photography mapping of the most interesting places of the Region is currently ongoing, of places such as the Sázava River, the Blaník Protected Landscape Area, the Medník area and the ore mines. Moreover, we have moving images available in the form of short motivational spots. You can view these in the E-television section on the [www.posazavi.com](http://www.posazavi.com) web pages.

All of the final outcomes of this project, co-financed by the Regional Operation Program of the Region Solidarity of the Central Bohemia, will be presented at an exhibition of photo posters by the photographer and film director Jaroslav Pelíšek.

The exhibition will start on the **11<sup>th</sup> of June 2010 and will be open from 8 a.m. to 4 p.m.** daily in the building of the Piarist Dormitory at Masarykovo Square 1 in Benešov. Also presented will be the posters from the first phase of the project – History in Pictures. Thus, you can see a total of 100 large-scale pictures depicting the Posázaví Region.

# KONOPIŠTĚ CHATEAU

The castle of Konopiště was founded at the end of the 13<sup>th</sup> century, probably by the bishop Tobias of Benešov. It was built as a Gothic fortress copying the design of French castles. First building alterations were ordered by George of Šternberk at the end of the 15<sup>th</sup> century, and later by Hodějovští of Hodějov in the 17<sup>th</sup> century. In the 18<sup>th</sup> century, Vrtbové of Vrtba converted the castle into a Baroque palace. Franz Ferdinand d'Este, who bought it in 1887, had it rebuilt into a grand emperor's residence.

The interior of the chateau boasts precious collections; among the most valuable is the so-called "Estenská" Weapons Collection, inherited by Archduke Franz Ferdinand d'Este from his Italian predecessors, and the St. George Collection brought together from scratch by Franz Ferdinand himself. Within a quarter of a century, he managed to collect a deposit of wood carvings, paintings and various artefacts of the art handicraft, which are related to the St. George's cult and date from the 15<sup>th</sup> century until the beginning of the 20<sup>th</sup> century. Competing with Franz Ferdinand in the collecting of antiquities related to St. George was the British King Edward VII, who was also an erudite collector of paintings and sculptures of the brave dragon-slayer.

#### You can see:

The instructive path "History and Nature of the Konopiště Chateau" provides elementary information about the development and current state of the park, as well as about its most significant places of interest. The whole area of the park (340 ha) can be explored on foot or on bike along two tracks marked with 12 informative boards. The circuits are also to the larger extent accessible for physically handicapped people on wheelchairs. The shorter track is focused on the closest surroundings of the chateau designed in the style of Italian Baroque and is approximately 2 km long. The longer track leads the visitors through more distant landscaping parts of the park and is about 7 km long. An important feature of the park is the Konopiště Pond with the area of 20,6 ha and a Rosary with glass houses founded in 1898 by the Viennese gardener Karl Mössner.

The Konopiště Chateau caters for wedding ceremonies, both civilian and religious ones.

There are refreshment facilities available including the d'Este **Café, cafeteria, Zamecká Restaurant, located in the newly reconstructed former kitchens** of Franz Ferdinand d'Este in the courtyard of the chateau, and the Růžová (Rose) Cafe in the Rose Garden.

You can take a historical train or a historical cabriolet to enjoy your journey from the car park to the so-called Chapels outside the chateau.

# BREWERY BENEŠOV

The Ferdinand Brewery in Benešov was founded by Archduke Franz Ferdinand d'Este in 1897. Throughout its existence it has used the traditional technology of bottom fermentation in open fermenting cellars and ripening in lager cellars.

The beer production is based on the original beer brewing recipes that uses only Czech malt and the best hops from the Žatec area. The brewery produces a typically Czech beer and the slogan 'true beer' in its name is more than just a statement. It is a statement and an obligation that all employees truly strive to fulfil. Ferdinand beer is typical for its golden colour, sparking pureness, strong relish, full-bodied taste and high, thick, frothy head.

The production line of the brewery offers five types of beer, ranging from non-alcoholic beer to a special kind. Its business policy is aimed mainly at the domestic region and export markets. However, as the employees keep receiving requests for a new type of beer, they are currently preparing a novelty from the Ferdinand beer family; a strong 15 % beer.

The brewery will be happy if you remain their customer and appreciate the taste of their true beer.

# JABLONNÁ NAD VLTAVOU CHATEAU

## JABLONNÁ NAD VLTAVOU CHATEAU

It was built on the site of an older water stronghold from the 14<sup>th</sup> century. The research of the building and uncovered paintings proved that the stronghold was transformed into a Baroque chateau in the 18<sup>th</sup> century. Jan Josef Kinský and countess Marie Anna Harbuval-Chamaré were

amongst the significant owners of the chateau. The chateau received a Neo-Classicism facelift during renovations in the second half of the 19<sup>th</sup> century. The cast-iron pillars, wrought railings and sculptures in the adjacent park also date from this last complex reconstruction. The figural sculpture called Harpist, Hunter, Flora, Autumn and Winter are the work of the German sculptor Möldner. Jablonná nad Vltavou, a chateau listed in the Cultural Heritage of the Czech Republic, is a typical example of a minor aristocracy seat or a summer residence. A company called ROYAL Interior bought the chateau in 2005; it carried out a complex reconstruction and installed its expositions into the premises. The most emphasis was applied to maintaining the original character of the building and adjacent park with sculptures during the reconstruction.

# TÝNEC NAD SÁZAVOU

**Týnec nad Sázavou** has a very long history. Its name itself indicates that at the place where the Týnec Castle is located these days – on a high cliff above the river – there was a fortified settlement in the ancient times, the so-called Týnec. There is a probable connection between the settlement and an old trade route leading from southern Bohemia through the town of Sázava and along the Kostelec Castle to Prague. Adjacent to a stone rotunda, a religious building, was a secular residential structure, uncovered during a research in 1969. It was just a stilted structure and dated back to the 11<sup>th</sup> century. A stone Romanesque palace was built on its place at the turn of the 13<sup>th</sup> century, with a prism defence tower next to the rotunda constructed later on. The palace currently houses the Municipal Museum with an exhibition of earthenware for which Týnec was famous in the period from 1791 to 1866.

There is also an exhibition on the history of the town of Týnec, a concert hall and an exhibition hall in the building. Nearby stands a Gothic tower of the Týnec Castle. It's used as the lookout with the view into the Posázaví region and there is the respected European summer domicile of the big bat. The Romanesque rotunda, used as the house of prayer by the Czechoslovak Hussite Church, it is also a part of Municipal Museum sightseeing.

# NATURAL TRAILS

Settlements and villages were built as early as in the Middle Ages in the bend of the Sázava River. One of the most famous families that owned the land in the basin of Sázava was the family of Lords of Dubá nad Sázavou. The castles guarded the important trade path and the river ford. Only ruins have been preserved from these buildings, yet you can feel history breathing from the walls and discover a lot of poetic nooks.

#### POSÁZAVÍ ROUTE NR. 19

The Sázava river may be followed by the bicyclists from the source at Českomoravská Vysočina up to the confluence with the Vltava river. There is 245 km long route built along the river.

They bicycle – route leads around many historical sights, in some places through a hilly terrain, in other places on comfortable routes along the river. Railway connection in the Posázaví area, leading along the entire course of the river is an advantage of making a tour in the Posázaví area, it can transport bicyclists with the bicycles for different sections of the bicycle – route.

The south-eastern part of the Central Bohemia region – Posázaví – offers a lot of possibilities for rest and getting to know nature and history. The nature trails are one of them. They can be taken as a separate program or used as an additional walk when visiting other sights or tourism goals.

#### MEDNÍK NATURE TRAIL

One of the oldest Natural Trails, Medník, can be found approximately 15 kilometres southeast of Prague in a picturesque valley of the Sázava River and on the forested slopes below Medník Hill.

A larger part of the Natural Trail, which received the name after the Medník National Natural Monument, is known to the public mostly due to the dog's-tooth violet, a critically endangered flower, which grows in this area.

Fourteen information boards introduce Medník from all angles, enabling the visitors to learn about the local beech wood, the importance of forests and trees, and debris forests. You can also read the highlights from the geology, history of tramping, boating and tourism in the Posázavský Pacifik area.

This rampart is one of the best preserved objects of the lately Gothic fortification architecture, within the genesis of the Middle-European fortification structures of the 15<sup>th</sup> century, exceeding by its significance the framework of Bohemia.

# CHATEAU JEMNIŠTĚ

The Baroque chateau Jemniště was built in 1720 – 1725 and today belongs to Jiří Sternberg.

The Jemniště chateau is the right place to carry out a romantic engagement dinner, a wedding or a family party, or a company dinner.

Custoza Cafe and a small shop will make your waiting for the tour more pleasant, or you may sit by the fire in the beautiful local apartments. Bring your children to see the theatre and animals during the season and invite your friends for a delicious meal in the restaurant. Let us look after you and spoil you; come to relax.

## 2010 news

The first change is the newly open **ZAMECKÁ RESTAURANT** in the former stables, which serves delicious food. Although located directly at the courtyard of the chateau, it lies aside from the main tourist route so mums with pushchairs are also welcome.

The second change of this season is the option to book a guided tour of the chateau park. A park-landscape architect will outline the history of the development of the chateau park, talk about the valuable trees and definitely answer all your eventual questions during the approximately one-hour tour. Thirdly, we have re-designed the wedding halls. There are two adjacent rooms.

The first one is furnished with screens adorned by orchid and hummingbirds motifs, while the second one is designed in the classical chateau colourful style. Wedding rooms are not traditionally white but very colourful, so that not even the tiniest details on the bride's white dress get lost.

# LEGENDARY BLANÍK MOUNTAIN

## KRAJ BLANICKÝCH RYTÍŘŮ

The region of the Blaník Knights called after the Blaník Hill is situated in the heart of the Posázaví. The legend says that an army under the command of

St. Wenceslas, the patron of the Czech land, sleeps inside the mountain and waits to go up to help the Czech nation at the worst of times. Up to now the army has not intervened yet, though nearly did several times. Occasionally a knight comes out of the mountain to check up how the people of Bohemia manage.

The region of Blaník knights is the place of natural beauties and rich history. In its heart there is a forested twin hill of Velký (Big) and Malý (Small) Blaník that gave its name to the region.

### LOOKOUT TOWER ON VELKÝ BLANÍK

The wooden covered tower of 29,5 m height is situated in the altitude of 638 m on top of the Velký Blaník hill. It was built in 1939 – 1941 from the initiative of the Club of Czech Tourists.

#### Opening hours:

April – September	Tue – Sun	10 a.m. – 5 p.m.
October – March	Sat, Sun, holidays	10 a.m. – 4 p.m.

### NATURAL PRESERVE AREA BLANÍK ADMINISTRATION

- guide service for organised groups

### NATURE TRAIL WITH A KNIGHT TO THE BLANÍK MOUNTAIN

The nature trail begins at the parking place at the foot of Velký Blaník over Louňovice pod Blaníkem, leading across the Velký Blaník mountain top to the parking place in Kondrace along the red tourism mark. The trail is long 4 km and there are 14 educational stops and 17 playful stops for children. Parking both cars and buses is possible on both ends of the trail, this over the villages of Kandrac and Louňovice pod Blaníkem.

On the Velký Blaník mountain top there is a view tower with the possibility of refreshment, there are resting places built on the trail. There is a steep ascending before the Velký Blaník mountain top. Therefore we recommend to the less fit visitors to choose a little bit longer route along the wood path. The trail is not suitable for prams, due to the same reasons. For prams we recommend to use also the wood path.

The Blaník Knight is the patron and as well the guide along the entire route. He acquaints with the nature of Velký Blaník and its surroundings, the history of its settlement or the Baník Knights reputations. You can see a copy of the National Theatre foundation stone coming from Blaník or the Knight sculpture. Also an outdoor geologic exposition of the Podblanicko area is a part of the trail where 21 big samples of rocks are exhibited.

### CHATEAU LOUNOVICE POD BLANÍKEM

The first written reference to the site dates back to 1149 and mentions a konvent of the Premonstratensians, founded in the so-called Moon Valley. The Lounovice konvent was ruined in 1420 by the Tabor forces that then dominated the whole region.

The museum displays findings of the archaeological research of the konvent, installed in the chateau by the National Museum in 1981. During a reconstruction in 1982, a band of sgraffito was uncovered, depicting an interesting view of the biblical theme of The Flood. Above the bossage of the entry portal there is the coat of arms of the archbishops as a reminder of the times when the chateau was in their possession. The collections also include a display of "The Oldest History of Lounovice pod Blaníkem" and a display dedicated to apiculture. Lounovice pod Blaníkem is also the birthplace of the music composer Jan Dismas Zelenka (1679 – 1745).

#### Chateau opening hours:

April – December	Tue – Sat	9 a.m. – 12 noon and 12.30 p.m. – 3.30 p.m.

Beyond opening hours upon reservation by telephone.

## THE TOWN OF VOTICE

Is situated right on the border of the region that the writer Jan Herben called the "Czech Siberia" – the region typical not only for cooler weather but also for number of smaller historical objects and natural beauties. You can admire the reconstructed Church of St. Wenceslaus in the town, which is a true copy of the church of Christ's Tomb in Jerusalem dating from 1685 and the Marian group of statues in the centre of the town. Also worth visiting is the well preserved

and maintained Jewish cemetery with the exhibition 'Jews and Jewish Monuments in the Votice Area'. The Ethnographic museum boasts a very nice exhibition of historical exhibits that witness the way of life in the Votice Area in the olden times.

The fans of hiking and biking can set off for the tracks or rides in the neighborhoods. The settlement Kaliště located in the Natural Park Džbány-Žebrák offers one of the most beautiful views of the region.

## Cultural Summer in Votice

# CHATEAU VRCHOTOVY JANOVICE

This originally stone stronghold of the noblemen of Janovice, protected by a moat, was gradually converted into a manor house in the Renaissance style, becoming the seat of the Votice branch of the counts of Vrtba in the 17<sup>th</sup> and 18<sup>th</sup> centuries. The last major reconstruction occurred in the mid 19<sup>th</sup> century, when the chateau received its current, neo-gothic look.

The chateau has belonged to the National Museum for over 40 years. It offers several permanent displays: "Society in 19<sup>th</sup> Century Bohemia", presenting life in Bohemia during this period; "Rilke, Kraus and Vrchotovy Janovice", acquainting visitors with the family of the last private owners of the estate, and in particular with the person of Sidonie Nadherná; and the "Czech Bellfoundry" display, guiding visitors through the history of bell making in the Czech lands. A visit to the estate may be concluded in the ancient landscaped park around the chateau.
